Barley	Covered smut	---	---	---	C	---	---	---	S	S	C
Barley	Loose smut	---	---	---	---	---	---	---	C	---	C
Oats	Covered smut	---	---	---	---	---	---	C-	---	---	C
Oats	Crown rust	---	---	---	---	---	---	---	C	---	---
Oats	Loose smut	---	---	---	---	---	---	---	C	---	C

¹ The C and S ratings in this table signify control and suppression, respectively. If no rating is shown, the product label does not mention this disease. These ratings are taken from product labels and technical bulletins. The plus and minus symbols have been added when there is a known difference among products within a C or S category. We know that some of these products control or suppress other diseases, but if it is not stated in nor interpretable from the label or technical bulletin, it is not shown here.

² Dividend Extreme is registered on wheat, triticale, and barley, and Dividend XL RTA is registered on barley and wheat.
