Galleon SC	penoxsulam	0	0	0	0	0 ^m	0 ^m	0 ^{m,l}
ProcellaCOR EC	Florpyrauxifen-benzyl	See label	0	0	See label	See label	See label	See label
Oasis	Topramezone	0 ^x	0 ^x	0 ^x	See label	See label	See label	See label
Phoslock	Lanthanum-modified bentonite clay	See label	See label	See label	See label	0	0	0

^a For Washington there are additional water use restrictions mandated within the Aquatic Plant and Algae Management General Permit and the Irrigation Canal General Permit.

^b See label for distance allowed from potable water intake.

^c Shorter interval may be used if approved assay indicates less than 0.1 ppm 2,4-D.

^d Do not use in ditches where water is used to irrigate highly susceptible crops, such as cotton, grapes, and tomatoes.

^e Less if Habitat herbicide residue levels are determined by laboratory analysis or other appropriate means of analysis to be below 1 ppb.

^f Drinking water can only be used when concentration of Renovate 3 is less than 0.4 ppm as determined by laboratory analysis.

^g See label for drinking water or grazing restrictions for lactating dairy animals.

^h If Renovate 3 residue levels are determined to be nondetectable by laboratory analysis, there is no restriction for use of irrigation water on established grasses.

ⁱ Restrictions suggested by manufacturer.

^j No restrictions if less than 20% of the water surface is treated.

^k When concentration is less than 50 ppb

^l When concentration is less than 1 ppb

^m When concentration is less than 30 ppb
